CAREER OBJECTIVE

Aspiring Full Stack Developer with strong interest in building scalable web applications and solving realworld problems. Seeking internship and entry-level opportunities to apply and enhance my development skills in a professional environment.

EDUCATION Einstein College of Engineering, Tirunelveli

B.E. Computer Science and Engineering | 2023 – 2027

CGPA: 8.28/10 Sokkalal Higher Secondary School, Mukkudal

HSC(+2): 86% | Year of Passing: 2023

SSLC(10th): Passed | Year of Passing: 2021

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, C
 - **Web:** HTML, CSS, React.js, Node.js, Express.js
 - **Database:** MongoDB
 - **Concepts:** REST APIs, WebSockets, Problem Solving, Web Scraping
 - **Tools:** Git, GitHub, VS Code, Render
-

EXPERIENCE React.js Training – Bevywise, Tirunelveli (June 2025 – July 2025)

- Learned React.js fundamentals including components and state management
 - Built small applications using React.js
 - Gained understanding of modern frontend development practices
-

PROJECTS Tamil Nadu Election Live Count Website (2026)

Technologies: HTML, CSS, JavaScript, Node.js, Express.js, WebSockets, Web Scraping

- Developed a real-time Tamil Nadu election live counting website with dynamic result updates
 - Implemented web scraping to fetch live vote count data from official ECI sources
 - Built backend services using Node.js and Express.js for automated data handling
 - Used WebSockets to display live counting updates instantly without page refresh
 - Designed responsive frontend UI for constituency-wise result visualization
-

TN HSC(+2) Result & Cutoff Calculator Portal

Technologies: HTML, CSS, JavaScript, Node.js, Express.js, Web Scraping, Caching

- Developed a student portal to fetch HSC(+2) results using Register Number and Date of Birth

- Integrated web scraping to retrieve student marks from the official Tamil Nadu results website
 - Implemented automatic cutoff calculation for Engineering and Medical admissions
 - Displayed total marks, pass/fail status, and cutoff details based on student group selection
 - Optimized performance by storing fetched result data in cache for faster repeated access
 - Designed responsive and user-friendly interface for both mobile and desktop users
-

College Bus Live Tracking System (Full Stack Application)

Technologies: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, WebSockets, GPS, Push Notifications, Android WebView (Java)

- Built a real-time bus tracking system using a Java-based WebView mobile application
 - Implemented live GPS tracking using WebSockets for real-time updates
 - Designed role-based access (Driver shares location, Students/Staff view, Admin assigns buses)
 - Handled push notification permissions on Android 13+
 - Used MongoDB to store user data, bus routes, and authentication details, while handling live location tracking using WebSockets without database storage
-

Recipe Search Application (Full Stack Application)

Technologies: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, WebView

- Developed a recipe search application with responsive UI
 - Built backend using Node.js and MongoDB for data management
 - Deployed the application inside a mobile app using WebView
 - Used AI-assisted development tools to improve UI and optimize code
-

To-Do List Application (Frontend Application)

Technologies: HTML, CSS, JavaScript

- Built a task management application with dynamic updates
 - Implemented DOM manipulation for real-time task handling
 - Designed a clean and user-friendly interface
 - Used AI-assisted tools to improve development efficiency
-

PROBLEM SOLVING

- Solved 200+ programming problems using Java on Gredious Learning Platform
 - Practicing Data Structures and Algorithms regularly
 - Strong logical thinking and debugging skills
-

SOFT SKILLS

Problem Solving | Teamwork | Communication
